
PMS LANDING PAGE REQUIREMENTS

Project Overview

Develop a modern, responsive, and attractive landing page for the Parking Management System. The landing page will serve as the main entry point for all system users and clients, providing quick access to different portals through dedicated login URLs.

The design should reflect a professional, smart, and technology-driven parking solution while maintaining high usability and responsiveness across all devices.

Objective

The purpose of the landing page is to:

- Present the Parking Management System professionally
- Provide easy access to different user portals
- Improve user experience
- Build client confidence through a modern UI/UX
- Ensure compatibility across mobile, tablet, and desktop devices

User Portals / URLs

The landing page must prominently display three separate login access options:

1. Admin Portal Login

- Dedicated login button/card
- Redirect URL for system administrators
- Access to system management and reporting

2. Operator Portal Login

- Dedicated login button/card
- Redirect URL for parking operators
- Access to operational functionalities

PMS LANDING PAGE REQUIREMENTS

3. Corporate Client Login

- Dedicated login button/card
- Redirect URL for corporate customers/clients
- Access to corporate dashboards and reports

Design Requirements

UI/UX Design

The landing page should:

- Have a premium and modern appearance
- Use professional color themes
- Include smooth animations and transitions
- Use attractive typography and iconography
- Create a strong first impression for clients

Visual Elements

Recommended sections:

Hero Section

- Attractive banner/image/video
- Smart parking-related visuals
- Catchy headline and subtitle
- “Login” or “Get Started” buttons

Features Section

Highlight major system features such as:

- Real-time parking monitoring
- Automated ticketing

PMS LANDING PAGE REQUIREMENTS

- Corporate parking management
- Reporting & analytics
- ANPR integration
- Mobile accessibility

About System Section

Short introduction about the parking management solution.

Contact/Footer Section

Include:

- Company information
- Support email
- Contact number
- Social media links
- Copyright

Responsiveness Requirements

The landing page must be fully responsive and optimized for:

Device Type	Resolution Support
Mobile Phones	Android & iPhone
Tablets	iPad & Android Tablets
Desktop Screens	All major resolutions
Large Displays	Full HD & higher

Technical Requirements

Frontend

Preferred technologies:

- HTML5
- CSS3
- JavaScript
- React.js / Next.js (Preferred)

Performance

- Fast loading speed
- Optimized images/assets
- SEO-friendly structure

Browser Compatibility

Support latest versions of:

- Google Chrome
- Microsoft Edge
- Firefox
- Safari

Functional Requirements

Login Navigation

Each portal button should:

- Redirect to its dedicated URL
- Open securely using HTTPS
- Be clearly identifiable

PMS LANDING PAGE REQUIREMENTS

Security

- Secure URL redirection
- Protection against unauthorized access attempts

Additional Requirements

Branding

- Company logo placement
- Professional branding colors
- Consistent UI theme

Animation & Effects

- Smooth hover effects
- Modern transitions
- Interactive buttons/cards

Accessibility

- User-friendly navigation
- Proper contrast and readability
- Mobile touch optimization

Expected Outcome

The final landing page should:

- Look modern and enterprise-level
- Attract and impress clients
- Provide seamless access to all user portals
- Deliver excellent performance across all devices
- Represent the Parking Management System professionally and effectively
